

Personal or Professional Portfolio Project

Description: Portfolio project consists of creating a professional/academic portfolio. The purpose of this project is to use the knowledge of HTML, CSS, and Bootstrap 5 to create a simple portfolio website.

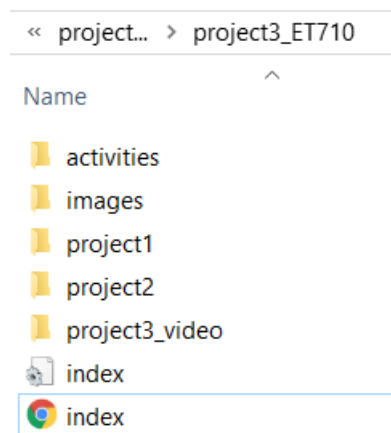

Students can pick the layout structure of their website, but the portfolio website should:

- 1. Be responsive website**

All elements and image of the entire project should be responsive.

- 2. Have folder and files organization**

Files should be organized in their respective folder and subfolders

- 3. Have navigation tabs**

The navigation tabs should have a scrollspy effect, and collapsible when change to small/medium screen size.

- 4. Have animation**

At least one animation to a text or image.

- 5. Have an introduction picture**

At least one introduction picture of yourself or a picture relative to your major.

- 6. Have and introduction paragraph**

Introduce yourself. In the introduction, you should include the following info:

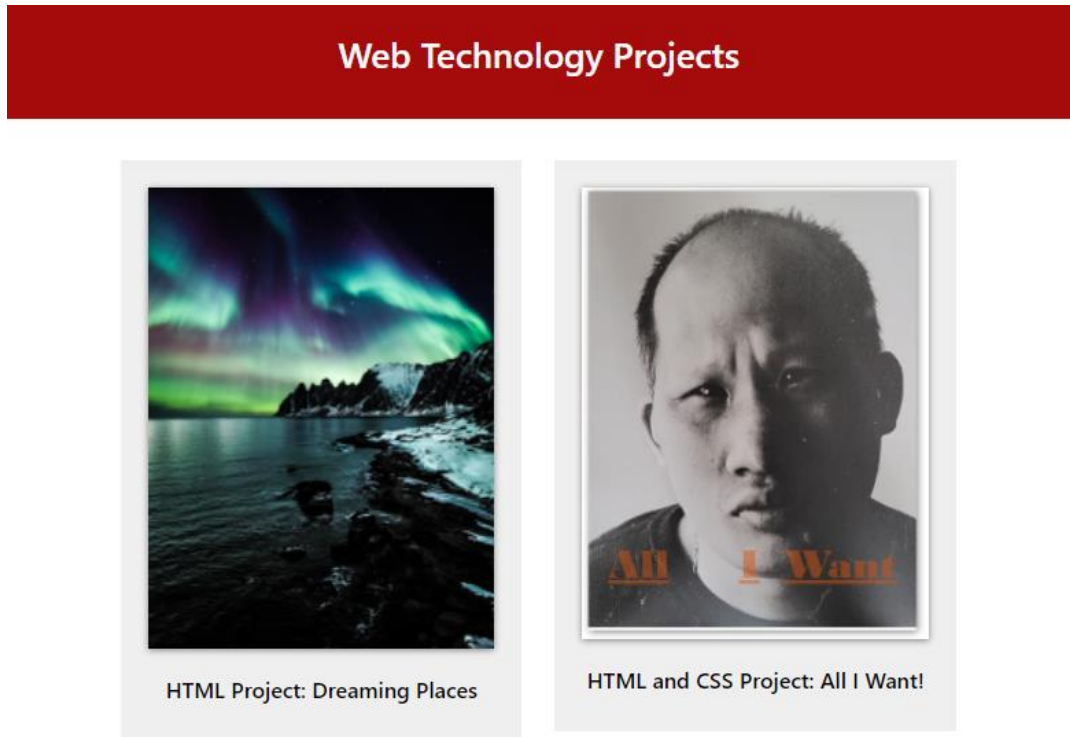

- Your current major.
- Future inspiration: plan after graduation, and what field do you plan to achieve your career goals.

- 7. Have a carousel/slideshow**

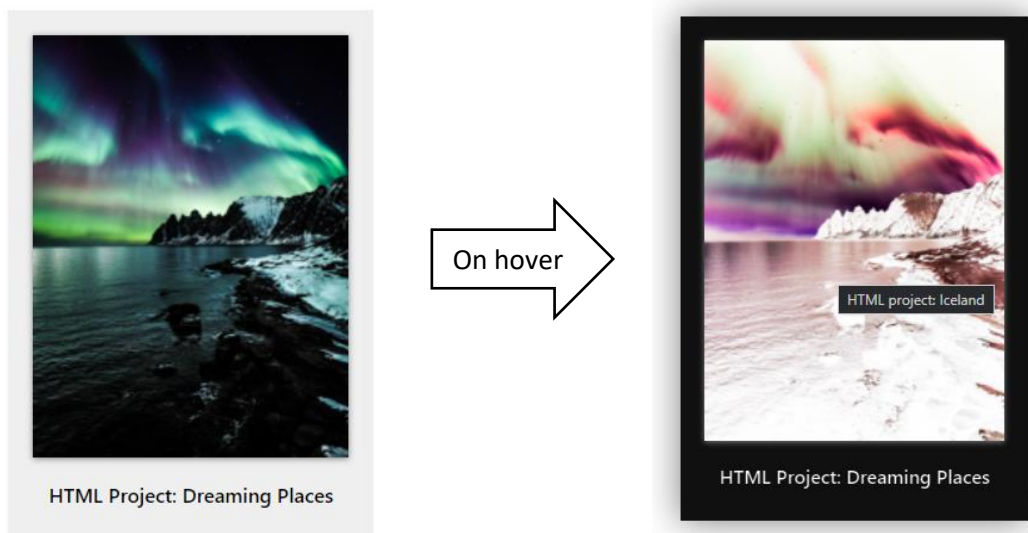

The project should have one carousel of images or text, with at least three slides.

8. **Have a project section using filter, card, and modal window**

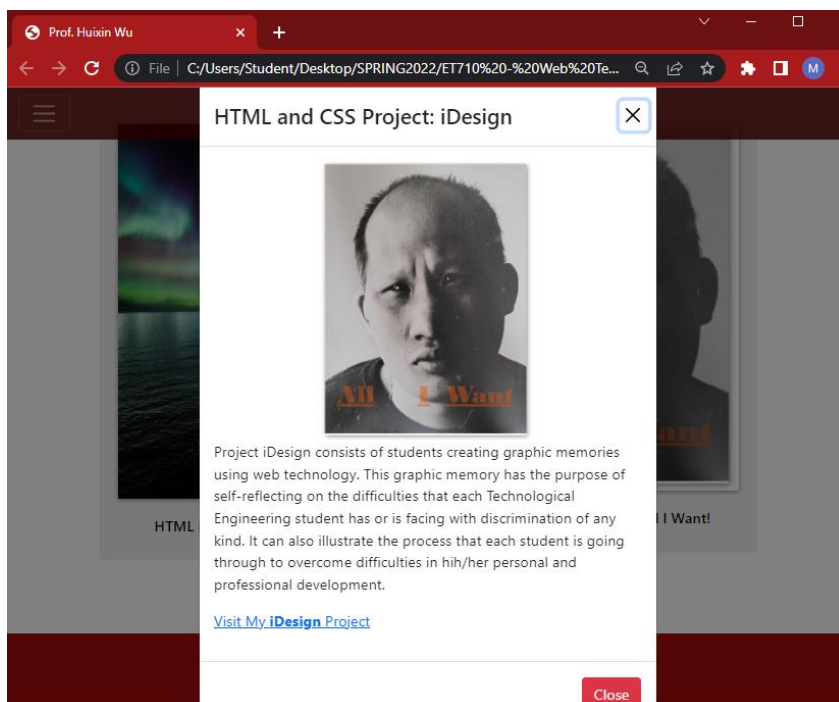

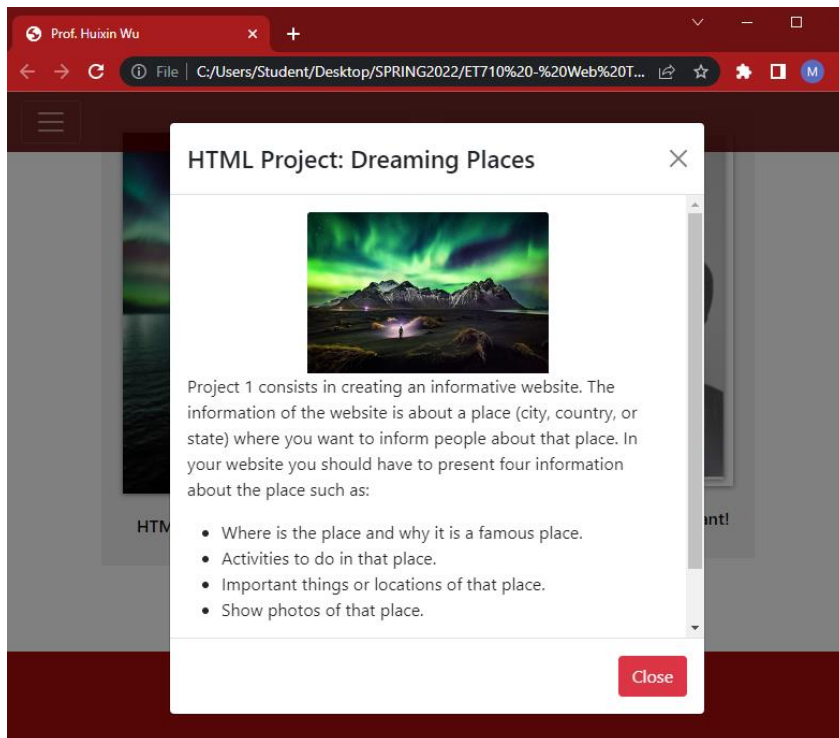

Use cards to design the project section. In the project section, you should introduce project 1 and 2. In the card presentation, it should show an image of the project and a title.

The card you have a hover effect, which is a filter:

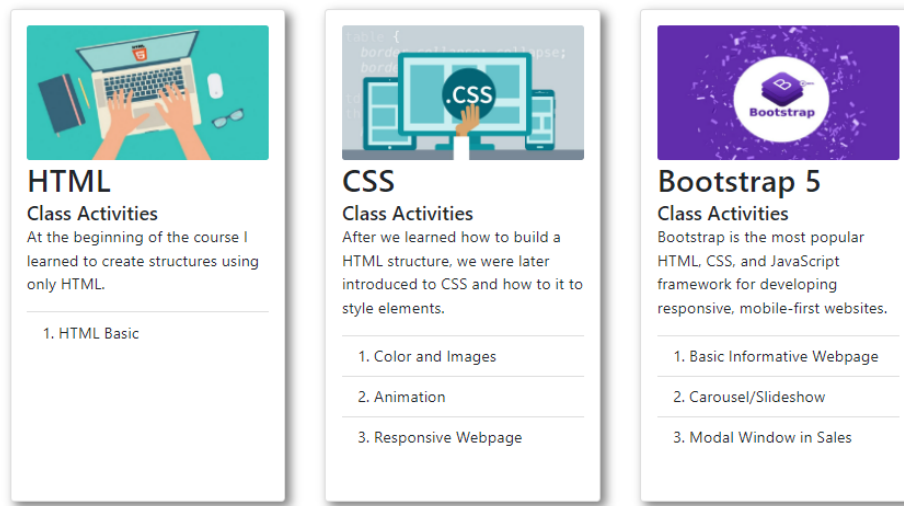

When click on the card, it should open a modal window. The modal dialog should have to different close button, modal title, project image, the project description and the reason/s why you picked the topic, and a link to the project.

9. **Have cards:** the Class Activities section should have three cards; HTML, CSS, and Bootstrap activities card

Class Activities

Each card should have an image relative to the topic, title, subtitle, description of activities, and links to each activity.

- The HTML activity that should have a link to HTML Basic activity.
- The CSS activities that should have three links: Color and images, animation, and responsive webpage activity.
- The Bootstrap activities that should have three links: basic informative webpage, carousel, and modal window activity.

10. **Have a contact section and social media icons:** the contact information should have, phone number, email, address, and social media icons that will link to its respective website. The information does not need to be real.

At the end of the footer, it should have the following text:

_____ Portfolio © 2022 by _____

This webpage is a template to create a portfolio website. All information and materials used are ONLY for educational purposes.
